Plastic Bags - The Facts

**The World uses 1.2 trillion bags per year \approx 1 million bags per minute
Each plastic bag is used for only 12-20 minutes before we dispose of it**

Each bag takes around 400 years to degrade

Plastic bags don't biodegrade, they photodegrade—breaking down into microscopic toxic pieces, contaminating soil and waterways and entering the food chain

Only about 1 in every 200 bags is recycled

In the UK, we use about 300 bags per person per year

The CO2 used in the production of Deeping's bags is equivalent to the CO2 produced in powering 417 households for a year

If we managed to make The Deepings Plastic Bag Free, our community alone would stop/eliminate the use of around 4 Million bags per year!
